Executive Summary

Version 3.7 makes the **storefront fully dynamic** and the **auth system production-ready**. Every previously hardcoded homepage section (hero slideshow, deals, testimonials) is now CMS-configurable. The auth system adds Google, Facebook, and TikTok OAuth, real email verification, and proper password recovery. Cookie/privacy compliance is implemented. Product metadata gains manual quantity entry and interval configuration. The CMS save UX is refined to "save and stay."

What Changed Since v3.6

Feature	Before v3.7	After v3.7
Hero Slideshow	3 hardcoded slides in component	CMS-configurable, max 4, API-backed
Special Deals	3 hardcoded deals	CMS-configurable, max 3, API-backed
Testimonials	3 hardcoded entries	CMS-configurable, API-backed
CMS Save Behavior	Redirects to list on save	Stays on edit page (Save & Stay)
Cookie/Privacy	No banner, broken links	Cookie consent banner + policy pages
Product Images	Decorative drag handle only	Functional drag-to-reorder + primary
Quantity Entry	Hardcoded preset dropdown	Per-product configurable (manual/interval/presets)
Auth	Email/password only	Google + Facebook + TikTok OAuth
Email Verification	Simulated (commented out)	Real email verification flow
Password Reset	Simulated (setTimeout)	Real SMTP password reset
Newsletter	Email signup form	Contact us form
Footer	4 phone numbers, dead links	3 phone numbers, working links
New DB Tables	5 v3.6 tables	+5 new tables (hero_slides, homepage_deals, homepage_testimonials, privacy_policies, product quantity columns)
New API Routes	16 routes	+13 routes (total 29 CMS/public routes)
New Pages	65	82 (17 new pages incl. CMS + policy + auth)

Version Overview

Release Information

Field	Details
Version Number	3.7.0
Release Date	May 2026
Platform	Web Application (printonline.et)

Field	Details
Supported Browsers	Chrome, Firefox, Safari, Edge (latest versions)
Supported Devices	Desktop, Tablet, Mobile
API Version	v1 (extended)
Database Schema Version	v3.7
Build Output	82 routes (65 static pages + 17 dynamic/API routes)

Development Timeline

Phase	Description	Status
Phase 1	Database Layer (5 new migrations + types)	✔ Complete
Phase 2	API Layer (13 new routes + Zod schemas)	✔ Complete
Phase 3	Hooks Layer (4 new hook files + 20 hooks)	✔ Complete
Phase 4	Auth System (OAuth, email verification, password recovery)	✔ Complete
Phase 5	Homepage CMS (hero, deals, testimonials pages + components)	✔ Complete
Phase 6	CMS UX Refinement (save-and-stay, image reorder, quantity config)	✔ Complete
Phase 7	Compliance & Contact (cookie banner, policy pages, contact form)	✔ Complete
Phase 8	Integration & Testing (build, lint, documentation)	✔ Complete

What's New in Version 3.7

F1: Dynamic Hero Slideshow

Category: Homepage CMS Enhancement
Impact Level: High — Admin team can now manage hero slides through CMS
User-Facing Change: Hero slideshow can be updated without code changes

What Changed

The hero slideshow previously had 3 hardcoded slides in `HeroSection.tsx`. Now slides are stored in the `hero_slides` database table and managed through the CMS. The component falls back to hardcoded data if the API is unavailable.

Features

- **CMS Management** — Add, edit, delete, and reorder hero slides at `/cms/settings/hero`
- **Max 4 Slides** — Enforced at CMS level with visible counter
- **Image Upload** — URL-based image management
- **CTA Customization** — Per-slide button text and link target
- **Active Toggle** — Enable/disable slides without deleting

- **Graceful Fallback** — Hardcoded defaults preserved if API fails

Where You'll See This

- **CMS** → **Settings** → **Hero Slides** — Manage slideshow content
 - **Homepage** — Slideshow renders active slides from CMS
-

F2: Dynamic Special Deals

Category: Homepage CMS Enhancement

Impact Level: High — Deals section now fully CMS-managed

User-Facing Change: Promotional deals can be updated via CMS

What Changed

Deals were previously hardcoded in `SpecialOffers.tsx`. Now stored in `homepage_deals` table and CMS-managed.

Features

- **CMS Management** — Add, edit, delete deals at `/cms/settings/deals`
- **Max 3 Deals** — Enforced at CMS level
- **Badge Customization** — Text and color (red/blue/green/yellow/purple)
- **Countdown Labels** — Per-deal timer text
- **Image & Link** — Custom image and destination URL per deal

Where You'll See This

- **CMS** → **Settings** → **Deals** — Manage deals
 - **Homepage** — Deals section renders active deals from CMS
-

F3: Dynamic Testimonials

Category: Homepage CMS Enhancement

Impact Level: Medium — Customer testimonials now CMS-managed

User-Facing Change: Testimonials updatable via CMS

What Changed

Testimonials previously hardcoded in `Testimonials.tsx`. Now stored in `homepage_testimonials` table.

Features

- **CMS Management** — Add, edit, delete testimonials at `/cms/settings/testimonials`
- **Rating** — 1-5 star rating per testimonial
- **Avatar** — URL-based avatar image
- **Project Tag** — Per-testimonial project reference

Where You'll See This

- **CMS → Settings → Testimonials** — Manage testimonials
 - **Homepage** — Testimonials section renders active entries
-

F4: Save-and-Stay CMS UX

Category: CMS UX Improvement

Impact Level: Medium — Better editing workflow

User-Facing Change: Save no longer redirects to list page

What Changed

Previously, saving a category or product in the CMS would redirect to the list page. Now:

- **Editing:** Save stays on the edit page with a "Changes saved" toast
 - **Creating:** First save redirects to the edit page (so subsequent saves stay)
 - **Save & Exit** — Future: a secondary button for users who want to return to list
 - **Duplicate Toast Fix:** Removed redundant toast from form `onSubmit` handlers
-

F5: Cookie/Privacy Compliance Banner

Category: Compliance Enhancement

Impact Level: High — Legal compliance requirement

User-Facing Change: Cookie consent banner on first visit

What Changed

The site previously had no cookie consent mechanism, and privacy/terms links in the footer led to 404 pages.

Features

- **Cookie Consent Banner** — Fixed bottom banner, non-intrusive, dismissible
 - **localStorage Persistence** — Once accepted, banner does not reappear
 - **Privacy Policy Page** — `/privacy` with CMS-managed content
 - **Terms of Service Page** — `/terms` with CMS-managed content
 - **Cookie Policy Page** — `/cookie-policy` with CMS-managed content
 - **CMS Management** — All policies editable at `/cms/settings/privacy`
 - **Graceful Fallback** — Hardcoded default content displayed if API fails
-

F6: Product Image Drag-to-Reorder

Category: Product CMS Enhancement

Impact Level: Medium — Admin team can now order product images

User-Facing Change: Drag-and-drop image ordering in CMS

What Changed

The product image manager previously had a decorative drag handle icon with no actual drag-to-reorder functionality. Now uses `@dnd-kit` for full drag-and-drop reordering.

Features

- **Drag-to-Reorder** — Click and drag images to new positions
- **Auto-Save** — Order persists automatically after drag
- **Set Primary** — Mark an image as the primary thumbnail
- **Delete** — Remove individual images

Where You'll See This

- **CMS** → **Products** → **[Product]** — Image manager with functional drag handles
-

F7: Manual Quantity Entry & Interval Config

Category: Product Metadata Enhancement

Impact Level: Medium — Per-product quantity configuration

User-Facing Change: Quantity input adapts to per-product config

What Changed

Previously, quantity selection was a hardcoded select dropdown. Now supports per-product configuration.

Features

- **Manual Quantity Entry** — Input field instead of dropdown (per-product toggle)
- **Quantity Interval** — Step increment (e.g., 5 = 5, 10, 15, 20...)
- **Custom Presets** — Admin-defined dropdown values (e.g., "50\n100\n250\n500")
- **Backward Compatible** — Existing behavior preserved when no config is set

Where You'll See This

- **CMS** → **Products** → **[Product]** → **Edit** — New "Quantity Configuration" section
 - **Product Detail Page** — Quantity input adapts to config
-

F8: OAuth Integration (Google, Facebook, TikTok)

Category: Auth Enhancement

Impact Level: High — Social login now available

User-Facing Change: Social login buttons on login/register pages

What Changed

Auth was email/password only via `better-auth`. Now includes Google, Facebook, and TikTok OAuth.

Features

- **Google Login** — Primary OAuth provider
- **Facebook Login** — Secondary OAuth provider
- **TikTok Login** — Additional OAuth provider
- **Social Login Buttons** — Reusable `SocialLoginButtons` component
- **Graceful Fallback** — Social buttons hidden if env vars are missing
- **Post-Login Redirect** — `callbackURL` support

Required Environment Variables

Variable	Purpose
<code>GOOGLE_CLIENT_ID</code>	Google OAuth client ID
<code>GOOGLE_CLIENT_SECRET</code>	Google OAuth client secret
<code>FACEBOOK_CLIENT_ID</code>	Facebook OAuth app ID
<code>FACEBOOK_CLIENT_SECRET</code>	Facebook OAuth app secret
<code>TIKTOK_CLIENT_ID</code>	TikTok OAuth client key
<code>TIKTOK_CLIENT_SECRET</code>	TikTok OAuth client secret

Where You'll See This

- **Login Page** — Social login buttons below email/password form
 - **Register Page** — Social signup buttons below registration form
-

F9: Forgot Password Email Recovery

Category: Auth Enhancement

Impact Level: High — Real password reset flow

User-Facing Change: Forgot password now sends real emails

What Changed

Previously, the forgot password flow was simulated with a `setTimeout`. Now it sends real password reset emails via SMTP using `better-auth`'s built-in `sendResetPassword` callback.

Where You'll See This

- **Forgot Password Page** — Enter email, receive reset link
 - **Reset Password Page** — New `/reset-password` page for the reset link callback
-

F10: New Account Email Verification

Category: Auth Enhancement

Impact Level: High — User accounts now require verification

User-Facing Change: New users must verify their email

What Changed

Previously, users could register and immediately use their account. Now:

- Verification email sent on signup
- Users redirected to `/verify-email` after registration
- `autoSignInAfterVerification` enabled

Where You'll See This

- **Registration** — Redirects to `/verify-email` page after signup
 - **Email** — Verification email with link sent via SMTP
 - **Verify Email Page** — `/verify-email` with instructions
-

F11: Contact Us Modal

Category: Homepage Enhancement

Impact Level: Medium — Newsletter section replaced

User-Facing Change: "Get In Touch" section replaces newsletter signup

What Changed

The "Unlock Exclusive Perks" newsletter section has been replaced with a "Get In Touch" contact form. The new form:

- Sends real API requests to `/api/contact`
- Has Name, Email, Phone, Subject (dropdown), and Message fields
- Submits via SMTP email to admin
- Maintains identical visual design (primary bg, glassmorphism card, noise texture)

Where You'll See This

- **Homepage** — "Get In Touch" section replaces newsletter
 - **API** — `POST /api/contact` endpoint for form submission
-

F12: Footer Update

Category: Site-wide Enhancement

Impact Level: Low

User-Facing Change: Updated phone numbers and working links

What Changed

- Removed `+251 116 68 69 40` landline number
 - Updated social media links from `#` to `/contact`
 - All links now functional
-

Migration Guide

Prerequisites

- Access to Supabase Dashboard (SQL Editor)
- Service role or postgres role permissions
- All prior migrations (001-024) already applied

Migration Files

Run these SQL scripts in the Supabase SQL Editor **in this exact order**:

#	Migration File	What It Does	Safe to Re-run?
1	<code>025_homepage_hero_slides.sql</code>	Creates <code>hero_slides</code> table + indexes + RLS + trigger + seed	Yes (uses IF NOT EXISTS)
2	<code>026_homepage_deals.sql</code>	Creates <code>homepage_deals</code> table + indexes + RLS + trigger + seed	Yes (uses IF NOT EXISTS)
3	<code>027_homepage_testimonials.sql</code>	Creates <code>homepage_testimonials</code> table + indexes + RLS + trigger + seed	Yes (uses IF NOT EXISTS)
4	<code>028_product_quantity_config.sql</code>	Adds columns to <code>products</code> table	Yes (uses IF NOT EXISTS)
5	<code>029_cookie_consent.sql</code>	Creates <code>privacy_policies</code> table + indexes + RLS + trigger + seed	Yes (uses IF NOT EXISTS)

Seed Data

All seed data is included in the migration files (hero_slides: 3 slides, homepage_deals: 3 deals, homepage_testimonials: 3 testimonials, privacy_policies: 3 policies — privacy, terms, cookie).

No separate seed files needed.

Verification Queries

```
-- 1. Verify hero_slides (expect 3 rows)
SELECT title, image_url, display_order, is_active FROM hero_slides ORDER BY display_order;

-- 2. Verify homepage_deals (expect 3 rows)
SELECT title, badge_text, badge_color, display_order FROM homepage_deals ORDER BY display_order;

-- 3. Verify homepage_testimonials (expect 3 rows)
SELECT name, rating, display_order FROM homepage_testimonials ORDER BY display_order;

-- 4. Verify products has new columns (expect 3 rows)
```

```
SELECT column_name, data_type, column_default
FROM information_schema.columns
WHERE table_name = 'products'
AND column_name IN ('manual_quantity_entry', 'quantity_interval',
'quantity_presets');

-- 5. Verify privacy_policies (expect 3 rows)
SELECT title, policy_type, version FROM privacy_policies ORDER BY policy_type;
```

CMS User Guide

Managing Hero Slides

1. Navigate to **CMS** → **Settings** → **Hero Slides**
2. View current slides with image preview and "X / 4" counter
3. Click **"Add Slide"** to create a new slide (max 4)
4. Fill in title, subtitle, image URL, CTA text/link, display order
5. Click **"Save"** to create
6. Edit or delete slides as needed
7. Toggle active/inactive to enable/disable slides
8. Changes reflect immediately on the homepage

Managing Special Deals

1. Navigate to **CMS** → **Settings** → **Deals**
2. View current deals with badge color swatches and "X / 3" counter
3. Click **"Add Deal"** to create (max 3)
4. Fill in: title, subtitle, description, image URL, badge text/color, link URL, countdown label
5. Save, edit, delete, and toggle as needed

Managing Testimonials

1. Navigate to **CMS** → **Settings** → **Testimonials**
2. Click **"Add Testimonial"** to create
3. Fill in: name, role, company, avatar URL, rating (1-5), quote, project
4. Save to update the homepage testimonial rotator

Managing Privacy Policies

1. Navigate to **CMS** → **Settings** → **Policies**
2. View privacy, terms, and cookie policies
3. Click **"Add Policy"** or edit existing
4. Set: title, content (markdown), policy type, version, effective date
5. Changes reflect on [/privacy](#), [/terms](#), and [/cookie-policy](#) pages

Product Quantity Configuration

1. Navigate to **CMS** → **Products** → **[Product]** → **Edit**

2. Find the **"Quantity Configuration"** section in the sidebar
3. Toggle **"Allow Manual Quantity Entry"** to enable text input
4. If enabled, set **"Quantity Interval"** (e.g., 5 for steps of 5)
5. If disabled, set **"Quantity Presets"** (one value per line, e.g., "50\n100\n250")
6. Save to update the product detail page quantity selector

Product Image Reordering

1. Navigate to **CMS → Products → [Product]**
2. In the **Images** section, drag images by the grip handle to reorder
3. Order saves automatically
4. Click the star icon to set an image as primary thumbnail

Auth Configuration Reference

OAuth Setup

The project uses **better-auth** with social providers. To enable OAuth:

1. Create OAuth apps at:
 - [Google Cloud Console](#) — OAuth 2.0 credentials
 - [Facebook Developers](#) — Facebook Login
 - [TikTok Developers](#) — TikTok Login
2. Set environment variables:

```
GOOGLE_CLIENT_ID=xxx
GOOGLE_CLIENT_SECRET=xxx
FACEBOOK_CLIENT_ID=xxx
FACEBOOK_CLIENT_SECRET=xxx
TIKTOK_CLIENT_ID=xxx
TIKTOK_CLIENT_SECRET=xxx
```

3. OAuth callback URLs follow **better-auth** convention:

```
http://localhost:3000/api/auth/callback/google
http://localhost:3000/api/auth/callback/facebook
http://localhost:3000/api/auth/callback/tiktok
```

Email Verification

- Enabled via **better-auth**'s **emailVerification** configuration
- Verification email sent on signup (**sendOnSignUp: true**)
- Auto sign-in after verification enabled
- Custom email template in **lib/email-templates/email-verification.ts**

Password Reset

- Real SMTP-based password reset via `better-auth`'s `sendResetPassword` callback
 - Uses `nodemailer` with existing SMTP configuration
 - Custom email template in `lib/email-templates/password-reset.ts`
-

API Reference

New v3.7 Endpoints

CMS Endpoints (Admin Only — require `isAdmin` check)

Method	Endpoint	Description
GET	<code>/api/cms/hero-slides</code>	Fetch all hero slides
POST	<code>/api/cms/hero-slides</code>	Create hero slide
GET	<code>/api/cms/hero-slides/[id]</code>	Fetch single slide
PUT	<code>/api/cms/hero-slides/[id]</code>	Update slide
DELETE	<code>/api/cms/hero-slides/[id]</code>	Delete slide
GET	<code>/api/cms/deals</code>	Fetch all homepage deals
POST	<code>/api/cms/deals</code>	Create deal
GET	<code>/api/cms/deals/[id]</code>	Fetch single deal
PUT	<code>/api/cms/deals/[id]</code>	Update deal
DELETE	<code>/api/cms/deals/[id]</code>	Delete deal
GET	<code>/api/cms/testimonials</code>	Fetch all testimonials
POST	<code>/api/cms/testimonials</code>	Create testimonial
GET	<code>/api/cms/testimonials/[id]</code>	Fetch single testimonial
PUT	<code>/api/cms/testimonials/[id]</code>	Update testimonial
DELETE	<code>/api/cms/testimonials/[id]</code>	Delete testimonial
GET	<code>/api/cms/privacy-policies</code>	Fetch all policies
POST	<code>/api/cms/privacy-policies</code>	Create policy
GET	<code>/api/cms/privacy-policies/[id]</code>	Fetch single policy
PUT	<code>/api/cms/privacy-policies/[id]</code>	Update policy
DELETE	<code>/api/cms/privacy-policies/[id]</code>	Delete policy

Public Endpoints (No Auth Required)

Method	Endpoint	Description
GET	/api/hero-slides	Fetch active slides (ordered)
GET	/api/deals	Fetch active deals (ordered)
GET	/api/testimonials	Fetch active testimonials (ordered)
GET	/api/privacy-policies	Fetch active policies (ordered)
POST	/api/contact	Submit contact form

POST Body — Hero Slide

```
{
  "title": "Professional Printing Solutions",
  "subtitle": "Premium quality printing services",
  "image_url": "/sample1.jpg",
  "cta_text": "Order Now",
  "cta_link": "/all-products",
  "display_order": 1,
  "is_active": true
}
```

POST Body — Homepage Deal

```
{
  "title": "Flash Sale",
  "subtitle": "Business Cards",
  "description": "Premium business cards at unbeatable prices",
  "image_url": "/sample20.jpg",
  "badge_text": "2 days left",
  "badge_color": "red",
  "link_url": "/products/premium-business-cards",
  "link_text": "View Offer",
  "countdown_label": "Special Offer",
  "display_order": 1,
  "is_active": true
}
```

POST Body — Testimonial

```
{
  "name": "Sarah Johnson",
  "role": "Marketing Director",
  "company": "TechCorp",
  "avatar_url": "/avatars/sarah.jpg",
  "rating": 5,
}
```

```
"quote": "Outstanding quality and service!",
"project": "Business Cards & Brochures",
"display_order": 1,
"is_active": true
}
```

POST Body — Privacy Policy

```
{
  "title": "Privacy Policy - PrintOnline.et",
  "content": "## Privacy Policy\n\nLast updated: May 2026...",
  "policy_type": "privacy",
  "version": 1,
  "is_active": true,
  "effective_date": "2026-05-14"
}
```

POST Body — Contact Form

```
{
  "name": "John Doe",
  "email": "john@example.com",
  "phone": "+251911000000",
  "subject": "Quote Request",
  "message": "I would like a quote for 500 business cards..."
}
```

Configuration Reference

New Site Settings Keys

Key	Default	Type	Category	Description
max_hero_slides	4	number	homepage	Maximum number of hero slides
max_deals	3	number	homepage	Maximum number of featured deals
contact_email	"panapromotionplc@gmail.com"	text	general	Contact form email recipient
show_cookie_banner	true	boolean	compliance	Show cookie consent banner

New Database Tables

Table	Purpose
<code>hero_slides</code>	Homepage hero slideshow content
<code>homepage_deals</code>	Special deals/promotions for homepage
<code>homepage_testimonials</code>	Customer testimonials for homepage
<code>privacy_policies</code>	Privacy, terms, and cookie policy documents

Modified Database Tables

Table	New Columns	Type	Default
<code>products</code>	<code>manual_quantity_entry</code>	BOOLEAN	false
<code>products</code>	<code>quantity_interval</code>	INTEGER	1
<code>products</code>	<code>quantity_presets</code>	JSONB	[]

Hook Query Keys (New v3.7)

Hook	Query Key
<code>useHeroSlides</code>	<code>["hero-slides"]</code>
<code>useAllHeroSlides</code>	<code>["hero-slides", "all"]</code>
<code>useDeals</code>	<code>["homepage-deals"]</code>
<code>useAllDeals</code>	<code>["homepage-deals", "all"]</code>
<code>useTestimonials</code>	<code>["homepage-testimonials"]</code>
<code>useAllTestimonials</code>	<code>["homepage-testimonials", "all"]</code>
<code>usePrivacyPolicies</code>	<code>["privacy-policies"]</code>
<code>useAllPrivacyPolicies</code>	<code>["privacy-policies", "all"]</code>

Known Issues & Upcoming Fixes

Current Known Issues

Issue	Severity	Workaround	Fix Planned
OAuth env vars not set in dev	Low	Social buttons show "Sign in with..." but redirect to login if providers fail	Set env vars for production
Email verification requires SMTP config	Medium	Registration works but verification email won't send	Configure SMTP env vars

Issue	Severity	Workaround	Fix Planned
Older testimonials not migrated from hardcoded data	Low	Adding via CMS replaces hardcoded defaults	Manual migration from seed
Homepage sections may flash hardcoded defaults briefly	Low	API calls are async; fallback shows until data loads	Add skeleton/loading states

Pre-existing Issues (Not Introduced by v3.7)

- Various `@typescript-eslint/no-explicit-any` warnings in pre-existing files
- `react/no-unescaped-entities` warning in orders page
- `react-hooks/set-state-in-effect` warning in CartDrawer

v3.8 Roadmap

High Priority

- **Storefront Integration** — Wire DB-backed delivery zones and site settings to storefront
- **PDF Receipt Generation** — Download orders as professional PDF
- **Admin CMS Message Interface** — Full admin dashboard for managing customer messages
- **Order Status Pipeline** — Enhanced order status management

Medium Priority

- **Search Functionality** — Improved product search with full-text search
- **Email Templates** — Updated templates for all new features
- **Analytics Dashboard** — CMS analytics for hero/deal/testimonial performance

Low Priority

- **Mobile Responsive Fixes** — UI improvements for mobile devices
- **Dark Mode Fixes** — Consistent dark mode across all new CMS pages
- **Automated Testing** — Comprehensive test suite for all features
- **Performance Optimization** — Further bundle size and load time improvements

Technical Details

Architecture

v3.7 follows established architecture patterns:

- **API Routes** — All CMS routes use `auth.api.getSession()` + `isAdmin()` + Zod validation + `supabaseAdmin`
- **Hooks** — TanStack Query hooks for data fetching, mutations with cache invalidation
- **Components** — shadcn/ui components with consistent styling

- **Types** — Manually appended convenience type aliases matching v3.6 patterns
- **Auth** — **better-auth** v1.4.1 with social providers + email verification

File Manifest

New Files (40+):

- 5 migration files (025-029)
- 13 API routes
- 4 CMS pages
- 8 CMS components
- 4 hook files
- 3 storefront components (ContactUsSection, CookieConsentBanner, PrivacyPolicyPage)
- 1 auth component (SocialLoginButtons)
- 3 policy pages (privacy, terms, cookie-policy)
- 1 email template (email-verification)
- 1 auth page (verify-email)

Modified Files (18+):

- Types, validations, auth config, storefront components, CMS forms, footer, layout

Security

- All CMS API routes require admin authentication
- Public API routes (hero-slides, deals, testimonials, policies) return only active records
- OAuth providers require proper env var configuration
- Email verification prevents unverified account access
- Input validation via Zod schemas on all write endpoints

Appendices

Appendix A: Version History

Version	Release Date	Key Features
1.0	—	Initial product catalog and ordering
2.0	—	Enhanced product configurations
3.0	—	Full e-commerce with Chapa payments
3.5	April 2026	Location-based pricing, messaging, account management
3.6	May 2026	Full CMS CRUD, site settings, delivery zones
3.7	May 2026	Dynamic homepage, OAuth, compliance, product metadata

Appendix B: Migration Dependency Chain

```
008_functions.sql (update_updated_at trigger function)
├─ 019_site_settings.sql
├─ 020_delivery_zones.sql
├─ 025_homepage_hero_slides.sql (uses update_updated_at)
├─ 026_homepage_deals.sql (uses update_updated_at)
├─ 027_homepage_testimonials.sql (uses update_updated_at)
├─ 029_cookie_consent.sql (uses update_updated_at)
└─ 028_product_quantity_config.sql (standalone ALTER TABLE)
```

Appendix C: New Packages

Package	Version	Purpose
@dnd-kit/core	latest	Drag-and-drop framework
@dnd-kit/sortable	latest	Sortable preset for dnd-kit
@dnd-kit/utilities	latest	dnd-kit utility functions

Appendix D: Build Output Summary

```
Route (app) – 82 total routes
├─ 65 static pages (prerendered)
├─ 17 dynamic pages / API routes
└─ 1 proxy (middleware)
```

End of Document
